

# BMLL Vantage

View the markets differently

bmlitech.com

BMLL Vantage is the quant analytics tool for all. An intuitive no-code visual application, bringing exceptional granular insight to all market participants by providing over 450 metrics derived from BMLL Level 3 Data, covering European and US Equity and ETF venues.

## 01. Venue Comparison

Examine how securities trade across multiple venues

## 02. Trading Optimisation

Understand market dynamics for better trading outcomes

## 03. Liquidity Discovery

Understand where liquidity lies with a complete view of markets & trading mechanisms

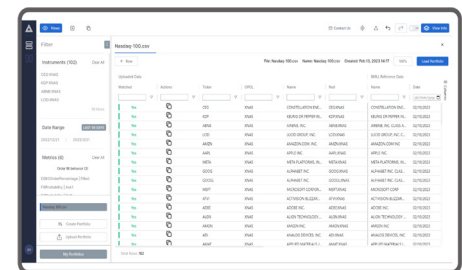

### Granular Insights

Generate meaningful insights at speed via a highly scalable API combined with an intuitive visualisation layer.

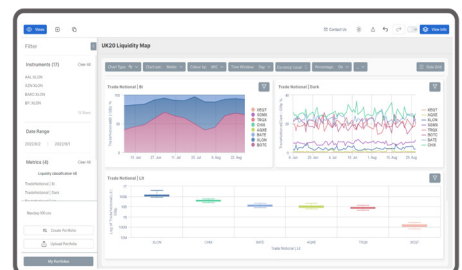

### Highly Accessible

Access and share granular insights without requiring a quant or data science resource via a no-code interface.

### Fully Flexible

Fully flexible charting allows users to easily switch between Views for a broad range of analyses. Build the Views that suit your team's business needs and change them as you require.

### Truly Collaborative

Easily share and comment on analysis with colleagues, collaborators or clients. Download Views in the formats you require.
